

NUR JUNAINA

Software Engineer

✉ junainanur@gmail.com 🌐 [junaina](#) in [nur-junaina-23825b1b4](#) 🌐 [nur-junaina.vercel.app](#)

PROFESSIONAL SUMMARY

Junior full-stack developer and Final-year Software Engineering student and full-stack developer who ideates like an artist, plans like an engineer, and executes like a developer. Hands-on experience in React/Next.js, TypeScript, Node/Express, Tailwind CSS, HTML/CSS, JavaScript, SQL/NoSQL databases, and familiarity with AWS (CloudFormation, EC2, S3, Lambda, DynamoDB, RDS, EFS) PHP/Laravel. Built and maintained web applications and REST APIs with a focus on systems thinking and product-mindedness. Comfortable with Git workflows, documentation, AI-assisted development, and safer releases through GitHub CI + Vercel preview/production checks.

EDUCATION

FAST National University of Computer and Emerging Sciences (FAST-NU)

Islamabad, Pakistan

BS Software Engineering

Expected Jun 2026

Bronze Medalist Fall 2025 Dean's List: Fall 2022 – Spring 2024 CGPA: 3.62 / 4.00

Relevant Coursework: Data Structures, Algorithms, Operating Systems, DBMS, Software Architecture, DevOps, NLP, Applied AI

EXPERIENCE & WEB PROJECTS

ITSOLERA

Remote

Full Stack Intern - Winter Internship Program

Jan 2026 – Apr 2026

- Awarded top-performing intern; built admin panel and RBAC projects using authentication, middleware, MERN, Next.js, FastAPI, and SQL/NoSQL databases.

ACT International (Aiming Change for Tomorrow)

On-Site

Software Engineer Intern - Laravel Consultant Roster System

2025

- Developed a role-based consultant management system using PHP/Laravel and MySQL, helping centralize consultant records, admin workflows, and access-controlled user management.

- Implemented auth, dashboards, validation rules, and database persistence to make the system more structured, secure, and easier to maintain.

- GitHub: github.com/junaina/act-consultants-roster

mindmesh – Final Year Project

2025–2026

Full-Stack Web Application

- Built a full-stack all in one ai workspace with modular Next.js dashboards, notion-style documentation, Prisma + PostgreSQL models, and FastAPI transcription/summarization and RAG services.

- GitHub: github.com/junaina/FYP-F-25-D-123-mindmesh-code

Momentum Habit Tracker

V1 Completed

Full-Stack Web App

- Built a minimal habit tracker with daily check-ins, stats/streaks, weekly progress view, Next.js App Router, TypeScript, Prisma, PostgreSQL, Zod, and Vercel preview deployments.

- Live: momentum-rust-six.vercel.app GitHub: github.com/junaina/momentum

NLP BizMatch

2025

Digital Services Marketplace

- Built a Next.js marketplace with buyer briefs, provider profiles, listings, matching, scoring, shortlisting, and comparison workflows.

- GitHub: github.com/junaina/nlp-biz-match

Shuffl

2025

One-Day Project Idea Generator

- Built a lightweight idea generator based on domain, difficulty, and tech stack, with a minimal UX designed to reduce decision paralysis.

- Live: shuffl-rho.vercel.app GitHub: github.com/junaina/shuffl

allamaorallama

2026

Guessing Game

- Built an interactive quiz game where players guess whether a couplet was by Allama Iqbal or a llama, with a focus on game UI and sound effects.

- Live: allama-or-a-llama.vercel.app GitHub: github.com/junaina/allama-or-a-llama

AI & ML PROJECTS

Meeting Transcription & Summarization Pipeline

Ongoing

Final Year Project Module

- Built a meeting transcription and summarization pipeline with timestamps, diarization, action-item extraction, and Google Drive integration.

Stock Market Time-Series Predictor

ARIMA vs LSTM

- Compared classical ARIMA models with LSTM networks for time-series prediction on AAPL and BTC-USD datasets.

Ask Mindy the AI

Ongoing

RAG Assistant

- Built a RAG-based assistant for document queries with cited sources.

EmpathAI

Emotion-Aware Chatbot

- Built an emotion-aware chatbot using BERT and LSTM models with mood tracking for sentiment analysis.

TECHNICAL SKILLS

Web Development: HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Node.js, Express.js, REST APIs, shadcn/ui, Tailwind CSS, Laravel

DBs, Cloud & Tools: Linux, AWS(CloudFormation, EC2, S3, Lambda, DynamoDB, RDS, EFS) MySQL, MongoDB, PostgreSQL, Prisma, Git, GitHub, Postman, Docker, Kubernetes

Languages: JavaScript, Python, C++, familiar with PHP, and Java Frameworks: MERN Stack, TensorFlow, Scikit-learn

Concepts and Soft Skills: OOP, Data Structures & Algorithms, Agile Development, DevOps, Testing, Documentation, AI-assisted development, Systems Thinking, Communication

VISION

I want to build the kind of software that turns raw ideas and messy workflows into something people can actually use, incorporating AI where it adds value. My goal is to grow as a full-stack software engineer who brings together creative thinking, clear planning, and strong execution.
